Candy Camera for PC is an online photo editor for Android & PC similar to the popular app Retrica, where you can use your phone cameras to create images, well edited and rich in effects. Similar to many others, such as Retrica, the honest camera provides faster access to filters and has a factor that is larger than many others Applications. If you take your photos to another level with Candy Camera, open the Photo Editor and you can choose whether or not to add the watermark in your photos. After that, you can take a picture, but before that you can select the filters on the screen by sliding your finger over your finger. Speaking of filters, these are divided into two types: classic and selfie. As their names show, classic filters for photos are with the camera back of your mobile phone, and selfie shows the filters that are best to take a photo of you. All can also be switched over by pushing the finger. To use Candy Camera, simply select a filter and then touch the colored button at the bottom of the screen. It serves to make the picture. After this is done, you can edit your photo with the options in the bottom bar. The first option gives you options that can brighten, improve a face, reduce spots and adjust lights. The second option gives you several options for the movie effect. The third option adds brilliant effects and light to a photo. With the fourth option you can add prints and stickers and the last, save the image on your phone. Candy Camera also works as an application of photo montages. READ PixelLab App for PC (Windows and Mac) Image Editor for Mobile Phones & Computer Candy Camera is a free photo editor that shows besides adding effects and filters a good application for photo montage.
